

Yallamati Satyam Babu

📞 9390999674 — ✉ satyambabuyallamati2004@gmail.com — [🌐 LinkedIn](#) — [🐙 Github](#) — [🌐 Portfolio](#)

Summary — Aspiring **Data Scientist & AI/ML Engineer** with strong skills in Python, machine learning, and statistical modeling. Experienced in building predictive models, performing exploratory data analysis, and deploying ML models using Flask. Passionate about transforming data into intelligent solutions through deep learning, NLP, and computer vision. Adept at using modern tools like Scikit-learn, TensorFlow, Pandas, NumPy, and Matplotlib to develop data-driven insights and end-to-end AI systems.

Skills

Programming: Python, SQL, HTML/CSS (for Flask UI)

Web Deployment: Flask, Streamlit, Render, GitHub Pages

Machine Learning: Regression, Classification, Clustering, Model Evaluation, Feature Engineering

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn

Deep Learning: Neural Networks, CNNs, RNNs (Basics), TensorFlow, Keras

Core Concepts: Statistics, Probability, Linear Algebra, Data Preprocessing, Model Optimization

Data Science Tools: Pandas, NumPy, Scikit-learn, Matplotlib

Version Control: Git, GitHub, Jupyter Notebook

Internship Experience

AI/ML Intern – Techno Future India [LINK](#) [🔗](#)

Dec 2024 - Apr 2025

- Built and evaluated multiple ML models (Linear Regression, Decision Trees, SVM) for predictive analytics tasks.
- Preprocessed raw datasets using Pandas & NumPy; applied feature scaling and encoding for optimal performance.
- Developed a mini Flask web app to visualize model predictions and demonstrate AI integration in real-world use cases.

Generative AI Intern — APSCH & Blackbuck Engineers [LINK](#) [🔗](#)

May 2024 - Jul 2024

- Worked on implementing Generative AI workflows for automated report generation using OpenAI APIs and Python.
- Applied prompt engineering and NLP-based models for data summarization and knowledge extraction.

Projects

Salary Prediction using Linear Regression (Flask Web App) [LINK](#) [🔗](#)

- Built a Flask web app to predict employee salary using a trained Linear Regression model with Scikit-learn, Pandas, and NumPy.
- Designed a responsive interface displaying real-time predictions without page redirects using HTML/CSS.
- Serialized the trained model with Joblib for deployment and reuse.

Stock Analysis Project – Python (Jupyter Notebook) [LINK](#) [🔗](#)

- Analyzed historical stock data with Python (Pandas, NumPy) and visualized trends using Matplotlib and Seaborn.
- Performed ETL preprocessing and generated risk-return and correlation visualizations.
- Built reproducible analysis pipelines for actionable financial insights.

AI-Powered Image Caption Generator (Deep Learning) [LINK](#) [🔗](#)

- Developed an AI image caption generator using BLIP model (PyTorch + Hugging Face Transformers).
- Created a Streamlit interface for real-time caption generation from uploaded images.
- Applied image preprocessing and caching for faster inference and deployment.

Education

KKR & KSR Institute Of Technology And Sciences

Bachelor of Technology in Information Technology

CGPA: 79.1 — 2021 – 2025

NRI Junior College - MPC

Marks: 795 — 2019 – 2021

Aditya High School - SSC

CGPA: 7.8 — Passout: 2019

Certifications

- Completed GenAI Powered Data Analytics Job Simulation (Sep 15, 2025, Forage) [🔗](#)
- Completed Data Analytics Job Simulation (Sep 17, 2025, Forage) [🔗](#)
- Certified in SQL from Hackerrank (Jul 25, 2024) [🔗](#)
